

# Senior Behavioral *Health Care*

Our program offers **short-term, inpatient care tailored specifically for older adults** in a compassionate and supportive environment. Located within Memorial Hospital Biloxi, our unit provides the added advantage of immediate access to comprehensive medical services. This ensures that any additional health concerns can be promptly addressed during the patient's stay, offering peace of mind and continuity of care.

An **individualized plan of care** is developed in collaboration with the patient and their family, beginning with a thorough physical and mental assessment conducted by our care team.

We offer a team of medical professionals who provide services including:

- ▲ Psychiatrist and therapist sessions
- ▲ Assistance with coping mechanisms and problem solving abilities
- ▲ Patient and family education
- ▲ Medication and medical management
- ▲ 24 hour monitoring and supervision

**For more information or to refer a patient, call (228) 575-1877.**
