\$100 DEXA Scan (Bone Density)

pricing good all year through October 31, 2027

Osteoporosis is the silent disease that causes bones to become more fragile and prone to fracture. It is a major health threat for more than 28 million Americans. A bone density test, also call densitometry, can determine if you have osteoporosis or are at risk.

Dual energy X-ray absorptiometry (DEXA) is an advanced technology that safely and painlessly measures bone density and mineral content.

This test offers very precise results and is the preferred test for diagnosing osteoporosis.

To schedule your DEXA scan call (228) 867-4395
